Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income. There are 50,290 households in the report area, with an average income of \$108,146 and a median income of \$94,276.

Of all the 4,051 students eligible for free or reduced price lunch, 67.8% are eligible for free lunch and 32.2% are eligible for reduced lunch.

Poverty - Children Below 200% FPL

In the report area 17.09% or 6,561 children are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Note: The total population measurements for poverty reports are lower, as poverty data collection does not include people in group quarters. See Methodology for more details.

Adult Literacy

Literacy data published by the Program for the International Assessment of Adult Competencies (PIACC) breaks adult literacy into three different "Levels". Those reported as Level 1 are at risk for being able to understand printed material. Those at the upper end of Level 1 can read and understand the text well enough to be able to perform small task, but might have difficulty understanding or drawing inferences from multiple forms of text. Those at the lower end may struggle with basic vocabulary or even be functionally illiterate.

The percentage at or below Level 1 for literacy in the report area is estimated at 9.9%, with a 95% probability that the actual (true, unknown) percentage is between 6.6% and 13.3%.

Report Area	Population Ages 16-74	Total At or Below Level 1	At or Below Level 1	Total Lower Credible Interval	Lower Credible Interval	Total Upper Credible Interval	Upper Credible Interval

Note: This indicator is compared to the state average.

Data Source: National Center for Education Statistics, *NCES - Program for the International Assessment of Adult Competencies*, 2017.

Adult Literacy Level 2

Those reported at Level 2 still struggle to perform text based informational tasks, but are considered to be nearing reading proficiency. People in this literacy level can usually be able to read printed words and digital print, as well as being able to relate and make inferences from multiple pieces of information that can be pulled from more than one document. Complex evaluation and inferencing may still be too difficult.

The percentage at or below Level 2 for literacy in the report area is estimated at 31.9%, with a 95% probability that the actual (true, unknown) percentage is between 27.3% and 36.6%.

Report Area	Population Ages 16-74	Total At or Below Level 2	At or Below Level 2	Total Lower Credible Interval	Lower Credible Interval	Total Upper Credible Interval	Upper Credible Interval

Adult Literacy Level 3

Those reported at Level 3 still are proficient in reading. This includes being able to understand and work with multiple complex texts, while still being able to evaluate the reliability of sources. People in this level can infer complex ideas and sophisticated meanings from written documents and texts.

The percentage at or below Level 3 for literacy in the report area is estimated at 58.2%, with a 95% probability that the actual (true, unknown) percentage is between 53.6% and 62.8%.

Housing

Households - Overview

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a

state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.

Housing Quality - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 50,290 total occupied housing units in the report area, 11,064 or 22.00% have one or more substandard conditions.

Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 8,187 rental homes in the report area, there were 156 eviction filings, for an eviction filing rate of 1.91%. 45 of the eviction filings ended in an eviction, for an eviction rate of 0.55%.

Note: Not all counties have data that has been provided. Indicator data do not include information about “informal evictions”, or those that happen outside of the courtroom.

Homeless Children & Youth

This indicator reports the number of homeless children and youth enrolled in the public school system during the school year 2019-2020. According to the data source definitions, homelessness is defined as lacking a fixed, regular, and adequate nighttime residence. Those who are homeless may be sharing the housing of other persons, living in motels, hotels, or camping grounds, in emergency transitional shelters, or may be unsheltered. Data are aggregated to the report-area level based on school-district summaries where three or more homeless children are counted.

In the report area, of all the 25,254 students enrolled in reported districts during the school year 2019-2020, there were 116 or 0.50% homeless students, which is lower than the statewide rate of 1.81%.

Note: Data are available for 81.80% school districts in the report area, representing 92.20% of the public school student population.

Other Social & Economic Factors

Social Vulnerability Index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community's ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community's social vulnerability.

The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability. The report area has a social vulnerability index score of 0.02, which is less than the state average of 0.30.

Built Environment - Broadband Access

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. These data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included.

Property Crime - Total

This indicator reports the rate of property crime offenses reported by law enforcement per 100,000 residents. Property crimes include burglary, larceny-theft, motor vehicle theft, and arson. This indicator is relevant because it assesses community safety.

In the report area, 1,976 property crimes occurred in 2014 and 2016 (two years). The property crime rate of 1,509.1 per 100,000 residents is lower than the statewide rate of 2,207.8 per 100,000.

Note: Data are suppressed for counties if, for both years of available data, the population reported by agencies is less than 50% of the population reported in Census, or if less than 80% of agencies measuring crimes reported data.

Physical Inactivity

Within the report area, 19,250 or 19.3% of adults aged 20 and older self-report no active leisure time, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health. Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Obesity

This indicator reports the number and percentage of adults aged 20 and older self-report having a Body Mass Index (BMI) greater than 30.0 (obese). Respondents were considered obese if their Body Mass Index (BMI) was 30 or greater. Body mass index (weight

[kg]/height [m]2) was derived from self-report of height and weight. Excess weight may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, there are a total of 27,771 adults age 20 and older who self-reported having a BMI greater than 30.0. This represents a 28.2% of the survey population.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

Late or No Prenatal Care

This indicator reports the percentage of women who did not obtain prenatal care until the 7th month (or later) of pregnancy or who didn't have any prenatal care, as of all who gave birth during the three year period from 2017 to 2019. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Within the report area, of the total births of 5,160 during 2017 and 2019, births with late or no prenatal care was 102 or 1.98%. This is lower than the national average rate of 6.12%.

Note: Data are suppressed for counties with population less than 100,000 or when the birth counts represent fewer than ten persons.

Access to Care - Mental Health Providers

This indicator reports the number of providers with a CMS National Provider Identifier (NPI) that specialize in mental health. Mental health providers include licensed clinical social workers and other credentialed professionals specializing in psychiatry, psychology, counseling, or child, adolescent, or adult mental health. The number of facilities that specialize in mental health are also listed (but are not included in the calculated rate). Data are from the latest Centers for Medicare and Medicaid Services (CMS) National Provider Identifier (NPI) downloadable file.

Within the report area there are 81 mental health providers with a CMS National Provider Identifier (NPI). This represents 57.31 providers per 100,000 total population.

Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Within the report area, there is 0 Federally Qualified Health Center. This means there is a rate of 0.00 Federally Qualified Health Centers per 100,000 total population.

Health Outcomes

Hospitalizations - Emergency Room Visits

This indicator reports the number and rate of emergency room (ER) visits among Medicare beneficiaries age 65 and older. This indicator is relevant because emergency room visits are "high intensity" services that can burden on both health care systems and patients. High rates of emergency room visits "may indicate poor care management, inadequate access to care or poor patient choices, resulting in ED visits that could be prevented"¹.

In the latest reporting period there were 20,179 Medicare beneficiaries in the report area. Beneficiaries had 4,686 emergency room visits, and the rate of visits per 1,000 beneficiaries was 533.0. The ER visit rate in the report area was lower than the state rate of 571.0 during the same time period.

Life Expectancy by Census Tract

This indicator reports the average life expectancy at birth. Life expectancy measures the average number of years from birth a person can expect to live, according to the current mortality experience (age-specific death rates) of the population. Life expectancy takes into account the number of deaths in a given time period and the average number of people at risk of dying during that period, allowing us to compare data across census tracts with different population sizes.

Within the report area, the average life expectancy at birth is 81.36 of the total population.

Note: Data are suppressed for areas with fewer than 5,000 total population (pooled) during the study period.

Deaths of Despair (Suicide + Drug/Alcohol Poisoning)

This indicator reports average rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdose, also known as "deaths of despair", per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummized for report areas from county level data, only where data is available. This indicator is relevant because death of despair is an indicator of poor mental health.

Within the report area, there were 188 deaths of despair. This represents an age-adjusted death rate of 27.5 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Mortality - Firearm

This indicator reports the 2016-2020 five-year average rate of death due to firearm wounds per 100,000 population, which includes gunshot wounds from powder-charged handguns, shotguns, and rifles. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. This indicator is relevant because firearm deaths are preventable and they are a cause of premature death.

Within the report area, there are a total of 43 deaths due to firearm wounds. This represents an age-adjusted death rate of 6.5 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 3,470 persons in the report area are of foreign birth, which represents 5.23% of the report area population. This percentage is less than the national average of 13.60%.

Jobs and Earnings by Sector

The number of jobs and total wage and salary earnings from employment in the report area are broken down by economic sector in this indicator output. These figures include both private and government employment. The sectors listed represent private employment except for the last table which includes all the earnings from jobs with local, state and federal government. A negative number means that overall business in that sector lost money for the year in the report area.

Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Children Eligible for Free or Reduced Price Lunch by School Year, 2012-13 through 2020-21

The table below shows local, state, and national trends in student free and reduced lunch eligibility by percent.

Note: The states below have more than 80% public schools labeled as "not reported" in 2020-2021. For consistency, these states still have their values calculated with the limited records on all geographic levels (unless there is not a single record reported in the selected area). Use with caution when comparing to other years. This issue might occur in other states/years as well.

For 2020-2021, watch out for Alaska, Arizona, Delaware, District of Columbia, Illinois, Massachusetts, Montana, Ohio, Oregon, Tennessee, Virginia, American Samoa, and Northern Mariana Islands.

The chart below displays the percentage of the students in each eligibility category out of the total number of students eligible for free or reduced price lunch. Of all the 62,938 students eligible for free or reduced price lunch, 85.3% are eligible for free lunch and 14.7% are eligible for reduced lunch.

Poverty - Children Below 200% FPL

In the report area 10.67% or 1,883 children are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Note: The total population measurements for poverty reports are lower, as poverty data collection does not include people in group quarters. See Methodology for more details.

Low Income and Low Food Access

This indicator reports the percentage of the low income population with low food access. Low food access is defined as living more than 1 mile (urban) or 10 miles (rural) from the nearest supermarket, supercenter, or large grocery store. Data are from the April 2021 Food Access Research Atlas dataset. This indicator is relevant because it highlights populations and geographies facing food insecurity.

24.50% of the low-income population in the report area have low food access. The total low-income population in the report area with low food access is 1,464.

Education

Attainment - Overview

Educational Attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over 25 years old, and is an estimated average for the period from 2017 to 2021.

For the selected area, 34.53% have at least a college bachelor's degree, while 18.42% stopped their formal educational attainment after high school.

Access - Head Start

Head Start is a program designed to help children from birth to age five who come from families at or below poverty level. The program's goal is to help children become ready for kindergarten while also providing the needed requirements to thrive, including health care and food support.

This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2022 Head Start locator. Population data is from the 2010 US Decennial Census. The report area has a total of 6 Head Start programs with a rate of 50.00 per 10,000 children under 5 years old.

Adult Literacy

Literacy data published by the Program for the International Assessment of Adult Competencies (PIACC) breaks adult literacy into three different "Levels". Those reported as Level 1 are at risk for being able to understand printed material. Those at the upper end of Level 1 can read and understand the text well enough to be able to perform small task, but might have difficulty understanding or drawing inferences from multiple forms of text. Those at the lower end may struggle with basic vocabulary or even be functionally illiterate.

The percentage at or below Level 1 for literacy in the report area is estimated at 13.3%, with a 95% probability that the actual (true, unknown) percentage is between 10.1% and 16.4%.

Report Area	Population Ages 16-74	Total At or Below Level 1	At or Below Level 1	Total Lower Credible Interval	Lower Credible Interval	Total Upper Credible Interval	Upper Credible Interval

Note: This indicator is compared to the state average.

Data Source: National Center for Education Statistics, [NCES - Program for the International Assessment of Adult Competencies](#). 2017.

Adult Literacy Level 2

Those reported at Level 2 still struggle to perform text based informational tasks, but are considered to be nearing reading proficiency. People in this literacy level can usually be able to read printed words and digital print, as well as being able to relate and make inferences from multiple pieces of information that can be pulled from more than one document. Complex evaluation and inferencing may still be too difficult.

The percentage at or below Level 2 for literacy in the report area is estimated at 23.9%, with a 95% probability that the actual (true, unknown) percentage is between 19.3% and 28.2%.

Adult Literacy Level 3

Those reported at Level 3 still are proficient in reading. This includes being able to understand and work with multiple complex texts, while still being able to evaluate the reliability of sources. People in this level can infer complex ideas and sophisticated meanings from written documents and texts.

The percentage at or below Level 3 for literacy in the report area is estimated at 62.7%, with a 95% probability that the actual (true, unknown) percentage is between 58.7% and 67.4%.

Housing

Households - Overview

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

**Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 4,161.72 rental homes in the report area, there were 76.34 eviction filings, for an eviction filing rate of 1.83%. 23.53 of the eviction filings ended in an eviction, for an eviction rate of 0.57%.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Homeless Children & Youth

This indicator reports the number of homeless children and youth enrolled in the public school system during the school year 2019-2020. According to the data source definitions, homelessness is defined as lacking a fixed, regular, and adequate nighttime residence. Those who are homeless may be sharing the housing of other persons, living in motels, hotels, or camping grounds, in emergency transitional shelters, or may be unsheltered. Data are aggregated to the report-area level based on school-district summaries where three or more homeless children are counted.

In the report area, of all the 157,395 students enrolled in reported districts during the school year 2019-2020, there were 1,659 or 1.05% homeless students, which is lower than the statewide rate of 1.81%.

Note: Data are available for 76.67% school districts in the report area, representing 90.97% of the public school student population.

Other Social & Economic Factors

Social Vulnerability Index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community's ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community's social vulnerability.

The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability. The report area has a social vulnerability index score of 0.17, which is less than the state average of 0.30.

Food Environment - Grocery Stores

Healthy dietary behaviors are supported by access to healthy foods, and Grocery Stores are a major provider of these foods. There are 12 grocery establishments in the report area, a rate of 18.26 per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments are also included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores, are excluded.

Obesity

This indicator reports the number and percentage of adults aged 20 and older self-report having a Body Mass Index (BMI) greater than 30.0 (obese). Respondents were considered obese if their Body Mass Index (BMI) was 30 or greater. Body mass index (weight [kg]/height [m]²) was derived from self-report of height and weight. Excess weight may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, there are a total of 11,516 adults age 20 and older who self-reported having a BMI greater than 30.0. This represents a 24.0% of the survey population.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

Late or No Prenatal Care

This indicator reports the percentage of women who did not obtain prenatal care until the 7th month (or later) of pregnancy or who didn't have any prenatal care, as of all who gave birth during the three year period from 2017 to 2019. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Within the report area, of the total births of 47,598 during 2017 and 2019, births with late or no prenatal care was 2,019 or 4.24%. This is lower than the national average rate of 6.12%.

Note: Data are suppressed for counties with population less than 100,000 or when the birth counts represent fewer than ten persons.

Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Within the report area, there is 0 Federally Qualified Health Center. This means there is a rate of 0.00 Federally Qualified Health Centers per 100,000 total population.

Persons Receiving Medicare

The total number of persons receiving Medicare is shown, broken down by number over 65 and number of disabled persons receiving Medicare for the report area. The U.S. Department of Health and Human Services reported that a total of 208,679 persons were receiving Medicare benefits in the report area in 2022. A large number of individuals in our society are aware that persons over 65 years of age receive Medicare; however, many of them are unaware that disabled persons also receive Medicare benefits. A total of 19,153 disabled persons in the report area received Medicare benefits in 2022.

Health Outcomes

Hospitalizations - Emergency Room Visits

This indicator reports the number and rate of emergency room (ER) visits among Medicare beneficiaries age 65 and older. This indicator is relevant because emergency room visits are "high intensity" services that can burden on both health care systems and

patients. High rates of emergency room visits "may indicate poor care management, inadequate access to care or poor patient choices, resulting in ED visits that could be prevented"¹.

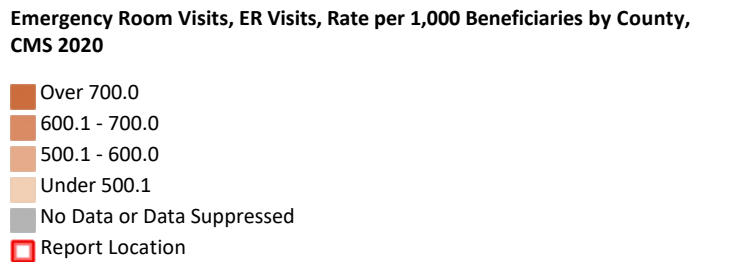

In the latest reporting period there were 10,317 Medicare beneficiaries in the report area. Beneficiaries had 2,550 emergency room visits, and the rate of visits per 1,000 beneficiaries was 578.0. The ER visit rate in the report area was higher than the state rate of 571.0 during the same time period.

This indicator reports the rate of diagnoses for mental health and substance use conditions among the Medicare population. Figures are reported as age-adjusted to year 2000 standard. Life Expectancy by Census Tract

This indicator reports the average life expectancy at birth. Life expectancy measures the average number of years from birth a person can expect to live, according to the current mortality experience (age-specific death rates) of the population. Life expectancy takes into account the number of deaths in a given time period and the average number of people at risk of dying during that period, allowing us to compare data across census tracts with different population sizes.

Within the report area, the average life expectancy at birth is 83.12 of the total population.

Note: Data are suppressed for areas with fewer than 5,000 total population (pooled) during the study period.

Deaths of Despair (Suicide + Drug/Alcohol Poisoning)

This indicator reports average rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdose, also known as "deaths of despair", per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because death of despair is an indicator of poor mental health.

Within the report area, there were 142 deaths of despair. This represents an age-adjusted death rate of 40.9 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Mortality - Firearm

This indicator reports the 2016-2020 five-year average rate of death due to firearm wounds per 100,000 population, which includes gunshot wounds from powder-charged handguns, shotguns, and rifles. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. This indicator is relevant because firearm deaths are preventable and they are a cause of premature death.

Within the report area, there are a total of 24 deaths due to firearm wounds. This represents an age-adjusted death rate of 7.3 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Mortality - Opioid Overdose

This indicator reports the 2016-2020 five-year average rate of death due to opioid drug overdose per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because opioid drug overdose is the leading cause of injury deaths in the United States, and they have increased dramatically in recent years.

Within the report area, there are a total of 44 deaths due to opioid overdose. This represents an age-adjusted death rate of 13.5 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Figure 2. Social Vulnerability Index

This graphic demonstrates what the social vulnerability index (SVI) is. It is broken down by SVI themes, SVI variables, and SVI description of American Community Survey Variables.

The first theme is socioeconomic vulnerability. Socioeconomic vulnerability is comprised of the following variables and their definitions:

- Below poverty: percent of persons below federally defined poverty line, a threshold that varies by the composition of household. Denominations is total population where they poverty status is checked.
- Unemployed: percent of civilians unemployed based on total population 16 years and older, includes unemployed persons actively seeking work.
- Income: per capita income calculated as the mean income for every person in the census tract.
- Percent of persons of persons 25 of age and older with less than a 12th grade education, including individuals with 12 grades but no diploma.

The second theme is household composition and disability. Household composition and disability is comprised of the following variables and their definitions:

- Aged 65 or older: percent of persons 65 years of age or younger.
- Aged 17 or younger: percent of persons aged 17 years of age or younger.
- Civilian with a disability: percent of civilian population not in an institution who are five years of age and older with a disability.
- Single-parent households: percent male or female householder with children under 18 and no spouse present.

The third theme is minority status and language. Minority status and language is comprised of the following variables and their definitions:

- Minority: percent minority inclusive of black, African American, American Indian, Alaska Native, Asian, Native Hawaiian, other Pacific Islander, Hispanic, Latino, other race alone, and two or more races.
- Speak English "less than well:" percent of persons five years of age or older who speak English less than "well," "not well," or "not at all," inclusive of all age groups and all languages.

The fourth theme is housing and transportation. The housing and transportation theme is comprised of the following variables and their definitions:

- Multi-unit structures: percent housing units with 10 or more units in structure (e.g., apartment buildings)
- Mobile homes: percent housing units that are mobile homes.
- Crowding: percent total occupied housing units (i.e., households) with more than one person per room – at household level, more people than rooms.
- No vehicle: Percent households with no vehicle available.
- Group quarters: percent of persons who are in institutionalized group quarters (e.g., correctional institutions, nursing homes) and non-institutionalized group quarters (e.g., college dormitories, military quarters). .
