Jobs and Earnings by Sector

The number of jobs and total wage and salary earnings from employment in the report area are broken down by economic sector in this indicator output. These figures include both private and government employment. The sectors listed represent private employment except for the last table which includes all the earnings from jobs with local, state and federal government. A negative number means that overall business in that sector lost money for the year in the report area.

Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income. There are 52,757 households in the report area, with an average income of \$123,045.25 and a median income of \$106,666.

Poverty - Children Eligible for Free/Reduced Price Lunch

Free or reduced price lunches are served to qualifying students in families with income between under 185 percent (reduced price) or

under 130 percent (free lunch) of the US federal poverty threshold as part of the federal National School Lunch Program (NSLP).

Out of 28,119 total public school students in the report area, 7,394 were eligible for the free or reduced price lunch program in the latest report year. This represents 26.4% of public school students, which is lower than the state average of 43.4%.

Note: States with more than 80% records "not reported" are suppressed for all geographic areas, including hospital service area, census tract, zip code, school district, county, state, etc.

Poverty - Children Below 200% FPL

In the report area 16.90% or 6,664 children are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Note: The total population measurements for poverty reports are lower than population totals for some other indicators, as poverty data collection does not include people in group quarters. See "Show more details" for more information.

Low Income and Low Food Access

This indicator reports the percentage of the low income population with low food access. Low food access is defined as living more than 1 mile (urban) or 10 miles (rural) from the nearest supermarket, supercenter, or large grocery store. Data are from the April 2021 [Food Access Research Atlas](#) dataset. This indicator is relevant because it highlights populations and geographies facing food insecurity.

20.23% of the low-income population in the report area have low food access. The total low-income population in the report area with low food access is 3,628.

Adult Literacy

Literacy data published by the Program for the International Assessment of Adult Competencies (PIACC) breaks adult literacy into three different "Levels". Those reported as Level 1 are at risk for being able to understand printed material. Those at the upper end of Level 1 can read and understand the text well enough to be able to perform small task, but might have difficulty understanding or drawing inferences from multiple forms of text. Those at the lower end may struggle with basic vocabulary or even be functionally illiterate.

The percentage at or below Level 1 for literacy in the report area is estimated at 9.9%, with a 95% probability that the actual (true, unknown) percentage is between 6.6% and 13.3%.

Level 1 Proficiency

Adult Literacy Level 2

Those reported at Level 2 still struggle to perform text based informational tasks, but are considered to be nearing reading proficiency. People in this literacy level can usually be able to read printed words and digital print, as well as being able to relate and make inferences from multiple pieces of information that can be pulled from more than one document. Complex evaluation and inferencing may still be too difficult.

The percentage at or below Level 2 for literacy in the report area is estimated at 31.9%, with a 95% probability that the actual (true, unknown) percentage is between 27.3% and 36.6%.

Housing

Households - Overview

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state

issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.

Housing Quality - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 52,757 total occupied housing units in the report area, 11,788 or 22.34% have one or more substandard conditions.

Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number of eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. For the year 2018, the Eviction Lab reports that, of 8,477 rental homes in the report area, there were 298 eviction filings, for an eviction filing rate of 3.5.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Homeless Children & Youth

This indicator reports the number of children and youth experiencing homelessness enrolled in the public school system during the 2021-2022 school year. This data source reports the number of students experiencing homelessness, defined as individuals who lack a fixed, regular, and adequate nighttime residence. This includes those who are sharing the housing of others, living in motels, hotels, or camping grounds, staying in emergency transitional shelters, or are unsheltered. Data are aggregated to the report-area level based on school-district summaries where three or more children experiencing homelessness are counted.

In the report area, of the 27,053 students enrolled in reported districts during the 2021-22 school year, there were 93 or 0.34% students experiencing homelessness, which is lower than the statewide rate of 1.67%.

Note: Data are available for 58.30% school districts in the report area, representing 84.10% of the public school student population.

Students Experiencing Homelessness by Primary Nighttime Residence

This table and chart below report the number of students experiencing homelessness by their primary nighttime residence. Data represent students who were enrolled in the public school system during the 2021-2022 school year. The data are aggregated at the report-area level based on school district summaries where three or more students were counted.

A brief description of each column is provided below:

- **Doubled-up:** Refers to doubled-up or shared housing due to loss of housing, economic hardship, or similar reasons.
- **Unsheltered:** Includes situations such as living in cars, parks, campgrounds, temporary trailers (including FEMA trailers), or abandoned buildings.
- **Hotels/Motels:** As indicated by the name, refers to stays in hotels or motels.
- **Shelters and Transitional Housing:** Refers to stays in shelters or transitional housing programs, as indicated.

Obesity

This indicator reports the number and percentage of adults aged 20 and older self-report having a Body Mass Index (BMI) greater than 30.0 (obese). Respondents were considered obese if their Body Mass Index (BMI) was 30 or greater. Body mass index (weight [kg]/height [m]²) was derived from self-report of height and weight. Excess weight may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, there are a total of 33,826 adults age 20 and older who self-reported having a BMI greater than 30.0. This represents a 32.9% of the survey population.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

Late or No Prenatal Care

This indicator reports the percentage of women who did not obtain prenatal care until the 7th month (or later) of pregnancy or who didn't have any prenatal care, as of all who gave birth during the three year period from 2017 to 2019. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Within the report area, of the total births of 5,160 during 2017 and 2019, births with late or no prenatal care was 102 or 1.98%. This is lower than the national average rate of 6.12%.

Note: Data are suppressed for counties with population less than 100,000 or when the birth counts represent fewer than ten persons.

Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Within the report area, there is 0 Federally Qualified Health Center. This means there is a rate of 0.00 Federally Qualified Health Centers

per 100,000 total population.

Health Outcomes

Hospitalizations - Emergency Room Visits

This indicator reports the number and rate of emergency room (ER) visits among Medicare beneficiaries age 65 and older. This indicator is relevant because emergency room visits are "high intensity" services that can burden on both health care systems and patients. High rates of emergency room visits "may indicate poor care management, inadequate access to care or poor patient choices, resulting in ED visits that could be prevented"¹.

In the latest reporting period there were 21,247 Medicare beneficiaries in the report area. Beneficiaries had 5,013 emergency room visits, and the rate of visits per 1,000 beneficiaries was 634.6. The ER visit rate in the report area was higher than the state rate of 630.2 during the same time period.

Life Expectancy by Census Tract

This indicator reports the average life expectancy at birth. Life expectancy measures the average number of years from birth a person can expect to live, according to the current mortality experience (age-specific death rates) of the population. Life expectancy takes into account the number of deaths in a given time period and the average number of people at risk of dying during that period, allowing us to compare data across census tracts with different population sizes.

Within the report area, the average life expectancy at birth is 81.36 of the total population.

Note: Data are suppressed for areas with fewer than 5,000 total population (pooled) during the study period.

Deaths of Despair (Suicide + Drug/Alcohol Poisoning)

This indicator reports average rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdose, also known as "deaths of despair", per 100,000 population. Figures are reported as crude rates. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because death of despair is an indicator of poor mental health.

Within the report area, there were 214 deaths of despair. This represents a crude death rate of 29.6 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Mortality - Firearm

This indicator reports the 2019-2023 five-year average rate of death due to firearm wounds per 100,000 population, which includes gunshot wounds from powder-charged handguns, shotguns, and rifles. Figures are reported as crude rates. This indicator is relevant because firearm deaths are preventable and they are a cause of premature death.

Within the report area, there are a total of 64 deaths due to firearm wounds. This represents a crude death rate of 8.9 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Wright Co. is the 10th largest of the 87 counties in the state. Its population increased so far this decade, ranking as the 1st fastest growing in the state from 2020 to 2024. Wright Co.'s population has a younger median age than the state and a smaller percentage of people aged 65 years and older. The population is aging, especially as the Baby Boom generation moves through the population pyramid (see Figure 1).

Wright Co. enjoyed a natural increase - more births than deaths from 2020 to 2024, but also experienced net in-migration - meaning more people moved in than moved out. In addition to domestic in-migration, Wright Co. welcomed net international in-migration - gaining new Minnesotans from foreign countries (see Table 2).

Labor force growth has slowed in recent years. After experiencing a net gain of workers each year from 1990 to 2000, Wright Co. averaged an annual gain of new workers from 2000 to 2010, and most recently a gain of new workers since 2010 (see Figure 7). Moving forward, Wright Co. is expected to add workers from 2025 to 2035 (see Table 6).

The labor market had grown extremely tight in recent years, with less than 1 jobseeker per vacancy until the pandemic recession intervened in early 2020 and the number of unemployed workers spiked. In 2024, job vacancies in Central returned to pre-pandemic levels, but employers are still seeing challenges finding enough workers for open jobs (see Figure 8).
